RE: Revised Proposed Standards II D

1. The Transportation Service Provider (TSP) should allow an existing Service Requester (SR) to permanently release capacity to any entity that meets the same creditworthiness and other tariff provisions used by the TSP to qualify a SR to receive service.
2. In complying with information requirements specified by the Transportation Service Provider (TSP) pursuant to NAESB WGQ Z 1, it should be acceptable for a wholly-owned subsidiary of a public entity to submit to the TSP the publicly available documents prepared by the Service Requester's parent company.
3. The Transportation Service Provider (TSP) should allow a Releasing Shipper to recall capacity at the Releasing Shipper's discretion, consistent with other NAESB WGQ recall standards.
