

At the last meeting we struggled with two link descriptors. The following are alternative suggestions for these links:

Standards of Conduct change to Non-discrimination Requirements or Non-discrimination Reqs.

Tariff Discretion Info. change to Exercise of Discretion

The first link is suggested in place of Standards of Conduct since the entire order was entitled Standards of Conduct and thus would include Energy Affiliate Info. Also the section of the Order describing the items included under this link were discussed in the order under the heading **H. Non-Discrimination Requirements**. The second link Exercise of Discretion is suggested to more clearly identify the items that would be viewable under this link – instances where the pipeline has exercised its tariff right to exercise discretion in applying its tariff provisions.
