

Work Paper for R98005 submitted by TransCapacity to resolve R98005

Modify 1.3.24 as redlined below:

1.3.24a

When used, Package ID should be: a) supported for *service requester* nominating, and, scheduling, b) *mutually agreed for confirmations and operator scheduled quantities*, c) *mutually agreed for allocations and imbalance reporting*, d) supported for ~~ng and~~ invoicing (sales and purchases) *when present in the sales and purchase initiation*, and e) *mutually agreed* ~~not required~~ for transport invoicing.

This makes 1.3.24 consistent with the standards already adopted in R98011 and R98012.
