BPS Work plan Item II H.

Proposed Standard z.____
Proposed by Keith Sappenfield, EnCana

Transportation Service Provider (TSP) and a Releasing Shipper should allow a Service Requester (SR) to bid upon capacity release offers if the SR is not in default with the TSP. After notification by the TSP that the SR is awarded capacity and that the SR is determined to be non-creditworthy, the SR should provide advance payments and adequate credit assurances to the TSP pursuant to the TSP's tariff within a reasonable period of time. TSP's capacity award notification to the SR should include the daily volume of the capacity award, the rate of the award, the amount of credit assurance required and the due dates for the SR to provide the required advance payment and credit assurances to secure the capacity.
