

TransCapacity Work Paper
Request No. R97046
August 27, 1999

Modified Standards:

1. Transportation is the term used to define the physical movement of gas through space and/or time.
2. Transportation Service Provider (TSP) is the term used to define an entity which operates physical facilities which facilities accomplish the movement of gas through space and/or time and which contracts with others to so move gas not owned by the TSP.
