Dear Veronica:

Please post this email for today's meeting. My edited version of Pete's comments is noted below and included in the User's Guide as a footnote.

FOOTNOTE- "A utility that provides retail natural gas bundled sales service within a state. Further, the utility's sales and transportation rates, its system supply gas purchasing practices and gas cost recovery are regulated by the state's public utility regulatory commission (or its equivalent)."

Thanks
Keith Sappenfield

To follow up on the definition of a Local Distribution Company, I offer the following :

"A utility which provides retail natural gas bundled sales service within a particular state and who's sales and transportation rates and its system supply gas purchasing practices and cost recoveries are regulated by its respective state public utility regulatory commission."

I think this definition is either consistent or not inconsistent with other definitions with NAESB .
