

National Fuel Distribution Alternative TTT S15

S15

Where pre-existing pooling points supporting Title Transfer Tracking (TTT) activity do not exist or are not accessible, Transportation Service Providers (TSPs) should, upon request establish pooling points at, or with respect to, these locations for the purpose of enabling TTT activity . TSPs may restrict availability of such pooling points to those points where an OBA is in effect. Further, TSPs may non-discriminatorily restrict such pooling points to system receipt points/zones or system delivery points/zones so long as transportation access to such pooling points is generally equivalent.
