

TECHNICAL IMPLEMENTATION OF BUSINESS PROCESS

The Authorization to Post Imbalances is used to initiate the ~~process of~~ posting ~~of~~ imbalances. ~~process.~~ It is sent from a service requester, or ~~his~~-their agent, to the transportation service provider. This authorization instructs the transportation service provider to “post” the service requester’s imbalances. ~~;~~ ~~p~~Posted imbalances can be viewed or, upon request, downloaded by other service requesters, or their agents. A transportation service provider will continue to post the service requester’s imbalances until the authorization to post imbalances is rescinded by the service requester.

SAMPLE PAPER TRANSACTION

The following example illustrates a paper transaction for the Authorization to Post Imbalances:

Authorization to Post Imbalances

Transportation Service Provider: General Pipeline (333222555)

Service Requester: Omega, Corp (222333444)
Contact Name : Orville Omega
Contact Phone: 999-555-4325

Authorization Effective Date: March 24, 2001
Authorization Indicator: Yes

Contract Holder Beta, Inc. (666555444)

TECHNICAL IMPLEMENTATION OF BUSINESS PROCESS

The Posted Imbalances Download is a listing of all posted imbalances on a transportation service provider's system that have been authorized for posting. It is sent from the transportation service provider to the data requester in response to an Upload of Request for Download of Posted Data Sets that requested the Posted Imbalances Download.

The **posted imbalance quantity** is expressed as a positive whole number. The **imbalance direction indicator** is used to designate whether the quantity is due to the service requester or due from the service requester.

TECHNICAL IMPLEMENTATION OF BUSINESS PROCESS

The Request for Imbalance Trade Quick Response ~~transaction set~~ is the response to the Request for Imbalance Trade. ~~This transaction set~~ is sent from the transportation service provider to the initiating trader.

The quick response informs the initiating trader of ~~whether or not there were~~ any errors or warnings associated with the Request for Imbalance Trade; ~~it also contains any applicable validation codes and messages generated during the validation process.~~

The **transaction status code** informs the receiver of the status of the entire Request for Imbalance Trade transaction. It also indicates the presence or absence of warnings and/or errors. **Validation codes** specify any errors or warnings. All validation codes may have an associated **validation message**. The validation message is a free form text field used to further clarify the validation code.

The **imbalance trade tracking id** used in the quick response originates in the Request for Imbalance Trade. It is sent in the quick response when there is an error or warning that pertains to a specific imbalance trade. If there is no error or warning associated with an imbalance trade, then the tracking id for that trade is not sent in the quick response.

~~During the hours of 9:00 AM CCT to 5:00 PM CCT, then a transportation service provider receives the Request for Imbalance Trade from an initiating trader by the conclusion of a given quarter hour period, the transportation service provider will send to the initiating trader's designated site a corresponding Request for Imbalance Trade Quick Response by the conclusion of the next quarter hour period. When the Request for Imbalance Trade is received during other hours, the transportation service provider will send the initiating trader's designated site a corresponding Request for Imbalance Trade Quick Response by 9:00 AM CCT, the next business day. The quarter hour periods will be defined to begin on the hour and at 15, 30, and 45 minutes past the hour. A given quarter hour will contain all transactions whose receipt time is less than the beginning of the subsequent quarter hour.~~

TECHNICAL IMPLEMENTATION OF BUSINESS PROCESS

The Imbalance Trade Confirmation ~~transaction set~~ is used by the confirming trader to indicate whether the imbalance trade has been accepted or rejected. ~~This transaction set~~ is sent from the confirming trader to the transportation service provider.

The confirming trader may not change any of the terms of the imbalance trade. The Imbalance Trade Confirmation must be received by the transportation service provider prior to the closing of the ~~transportation service provider's~~ imbalance trading ~~window~~period, or the imbalance trade will not take place.

The **imbalance trade tracking id** used in the Imbalance Trade Confirmation originates in the Request for Imbalance Trade. It identifies the specific trade being confirmed.

SAMPLE PAPER TRANSACTION

The following example illustrates a paper transaction for the Imbalance Trade Confirmation:

TECHNICAL IMPLEMENTATION OF BUSINESS PROCESS

The **sending of the** Request for Confirmation of Imbalance Trade ~~transaction set~~ is an optional ~~transaction set~~. If the transportation service provider chooses to support ~~this transaction set~~, then ~~this the~~ request will be sent from the transportation service provider to the confirming trader.

~~The Request for Confirmation of Imbalance Trade will inform the confirming trader that a valid Request for Imbalance Trade has been received and processed by the transportation service provider, and that a confirmation of that request by the confirming trader is required.~~

The Request for Confirmation of Imbalance Trade requests confirmation from the confirming trader of a valid Request for Imbalance Trade that has been received and processed by the transportation service provider.

The **imbalance trade tracking id** used in the Request for Confirmation of Imbalance Trade originates in the Request for Imbalance Trade. It identifies the specific trade for which confirmation is being requested.

The **trade quantity requested** is expressed as a positive whole number. The **imbalance trade direction indicator** is used to designate whether the quantity is being traded:

- TO the initiating trader FROM the confirming trader, or
- FROM the initiating trader TO the confirming trader.

SAMPLE PAPER TRANSACTION

The following example illustrates a paper transaction for the Request for Confirmation of Imbalance Trade:

Mary B. Service 999-555-1212

TECHNICAL IMPLEMENTATION OF BUSINESS PROCESS

The Request for Imbalance Trade is used to initiate the process of trading imbalances. The party submitting the request to the transportation service provider is identified as the **initiating trader**. The initiating trader provides the specifics of the trade for both the initiating trader and the party with whom they are **proposing to tradingtrade**, the **confirming trader**.

The contract holder is the party to whom the imbalance has been assigned. In the situation where the transportation service provider has the business practice of netting imbalances across contract holders for a single agent, the agent becomes the party listed as the contract holder.

The **imbalance trade tracking id** originates in the Request for Imbalance Trade. It is line item specific and is used to tie **the Request for Imbalance Trade** to the Request for Imbalance Trade Quick Response, the Request for Confirmation of Imbalance Trade (a mutually agreed data set), the Imbalance Trade Confirmation and the Imbalance Trade Notification **back to the Request for Imbalance Trade**. It is neither validated by the receiver of the process, nor is it used as a key in the receiver of the process' data base.

The **trade quantity requested** is expressed as a positive whole number. The **imbalance trade direction indicator** is used to designate whether the quantity is being traded:

- TO the initiating trader FROM the confirming trader, or
- FROM the initiating trader TO the confirming trader.

TECHNICAL IMPLEMENTATION OF BUSINESS PROCESS

The Withdrawal of Request for Imbalance Trade is ~~utilized in the event that~~ used when the initiating trader decides to withdraw ~~the-an~~ imbalance trade. It is sent from the initiating trader to the transportation service provider.

An imbalance trade, ~~however,~~ can be withdrawn, only if the confirming trader has not confirmed the imbalance trade.

The **imbalance trade tracking id** used in the Withdrawal of Request for Imbalance Trade originates in the Request for Imbalance Trade. It identifies the specific trade being withdrawn.
