Carl & Dick: At the March 21 meeting the of the FTTF, we adopted a new misison statement. A motion was made, and passed, to present this statement to the EDM committee for approval. Could you please add this to the agenda of the next EDM meeting? THANKS!

New Mission Statement:

The GISB Future Technology Task Force (FTTF) operates at the direction of the Electronic Delivery Mechanism Committee (EDM) and reports its recommendations to EDM or the Executive Committee. Based on requests referred or triaged to FTTF, the FTTF reviews technology in light of business practice standards adopted by or proposed in GISB and assesses the feasibility of technical implementation. At least annually, pursuant to GISB Standard 4.3.59, the FTTF is also required to review the technical standards and minimums contained within adopted GISB standards to determine if updating or revision of those technical standards and minimums is necessary. The FTTF also monitors technology standards, trends and developments for their applicability to the natural gas industry.
