TW: For the entire document, the headers and footers need to be reviewed carefully to ensure consistency -- and several sections need watermarks.

Note 2; Label: GISB; Date: 10/14/99 10:08:26 PM

All dates have been changed to the earliest possible publication date -- November 15, 1999 -- which assumes that the EC takes final action on this manual on November 12, 1999.

EII was added to the request no. column as R99036 did not by itself cause the modifications to be made.

Note 2; Label: GISB; Date: 10/14/99 7:01:07 PM

The modified standards and new standards categorized as "EDM Related" are listed here. The Action column probably does not contain enough information and should be reviewed.
