Re: Comments for February 22, 2001
GISB Executive Committee Meeting

Rae,

Enron Transportation Services Company (ETS) submits the following comments regarding the GISB recommendations that have been posted for industry comment. Comments are due by February 20 and will be addressed at the February 22, 2001 meeting of the GISB Executive Committee.

- **R96124, et al (Shipper Imbalance)** → At their December 14, 2000 meeting, the EC sent this recommendation back to IR for further work. Based on comments received from ETS, the Information Requirements Subcommittee (IR) has reinstated the 'Imbalance Value' data element. As part of this effort, IR determined that the existing Condition for this data element should in fact be deleted. This is reflected in the draft minutes of the January 9 – 10 IR meeting. However, the recommendation form that was distributed for comment does not reflect this deletion. ETS suggests that the Condition be deleted and that the revised recommendation be adopted by the EC.

Thank you,

Theresa L. Hess
