

# **Future Technology Task Force**

## **Mission Statement: \***

The GISB Future Technology Task Force (FTTF) investigates and recommends the minimum standards of technologies and practices that could or should be used to conduct electronic commerce within the gas industry.

## **Role of FTTF: \***

- Evaluate and submit recommendations on any Requests for Standards directed to the task force by the Executive Committee
- Review business standards and analyze the effect they may have on technical requirements
- Review current technical standards and recommend modification and enhancements when necessary
- Track technology standards and trends for their applicability to the natural gas industry

\* Taken from response to the Process Subcommittee on August 14, 1997
