

Duke Energy

Proposed language to replace 4.3.A/L:

A Transportation Service Provider who determines to provide transactional functions via GISB EBB/EDM, for each transaction upon inception of support for such service should:

If GISB EDI/EDM or FF/EDM standards exist for the function, provide the service via EDI/EDM, or FF/EDM or both, utilizing modifications defined by the Transportation Service Provider to the existing file structures.

Submit a request for standardization to GISB including details of the EBB/EDM, EDI/EDM and/or FF/EDM implementation.
