This window is used internally to monitor the various notices generated in GEMS.

E-mail Tab (shown above)

This window is used by ANR staff to determine where GEMS E-mail notices were sent and when. GEMS will automatically generate emails for cut notifications when the customer indicates that they want to receive GEMS Emails as part of their nomination cut notification process. Allows ANR to resend the notice.

VSI Fax Tab (detail on tab is not shown)

This tab reflects where VSI Fax notices were sent and when. GEMS will automatically generate faxes for cut notifications when the customer indicates that they want to receive faxes as part of their nomination cut notification process.

Autodialer Tab (detail on tab is not shown)

This tab reflects where Autodialer notices were sent and when. GEMS will automatically generate phone calls to customers and leave messages about cut notifications when the customer indicates that they want to receive autodialer notices as part of their nomination cut notification process. The customer is able to identify the contact and autodialer phone number in the GEMS Entity system.
