

## **WORKPAPER PREPARED 10/12/98**

Representatives from the following companies participated in a meeting where the recommendations listed below were developed: CIG, Duke, El Paso, Enron, Koch, Mojave, NGPL, Tennessee Gas Pipeline and Williams Gas Pipeline.

### **CLEANUP OF HEADER/DETAIL/CONTENT AREA STANDARDS**

#### **1. Modify 4.2.7:**

For Informational Postings Web sites, “Navigational Area” is the term used to describe the area on the left side of the browser display providing links to the Content Area and other navigational links.

Existing 4.2.7:

“Navigational Area” is the term used to describe the area on the left side of the browser display providing links to the Content Area and other navigational links.

#### **2. Modify 4.2.8:**

For Informational Postings Web sites, “Content Area” is the term used to describe the area directly to the right of the Navigational Area of the browser display.

Existing 4.2.8:

“Content Area” is the term used to describe the area directly to the right of the Navigational Area of the browser display.

#### **3. Modify 54 (d7):**

For Customer Activities Web pages, “Header” is the term used to describe the area at the top of the page.

Existing 54:

“Header” is the term used to describe the area at the top of the Content Area of the browser display.

#### **4. Modify 55 (d8):**

For Customer Activities Web pages, “Detail” is the term used to describe the area directly below the Header.

Existing 55:

“Detail” is the term used to describe the area directly below the Header in the Content Area of the browser display.

#### **5. Modify 34.8 (s18) - split into 2 standards:**

a. For Customer Activities Web pages, navigation should be in the Header on the left.

b. For Customer Activities Web pages, processing functions should be in the Header on the right.

Existing 34.8:

Where navigation and/or processing functions exist for a Customer Activity, the Content Area should contain navigation in the header on the left and processing functions in the header on the right.

#### **6. Modify 34.3 (p8):**

For Customer Activities Web pages, information that is constant for the page may be placed in the Header.

Existing 34.3:

Information that is constant for the displayed Content Area may be placed in the page header.

**7. Modify 34.7 (s17):**

For Customer Activities Web pages, totals, when appropriate, should be displayed in the Detail in a manner which distinguishes them from the data.

Existing 34.7:

Totals, when appropriate, should be displayed within the Content Area of the Web page in a manner which distinguishes them from the data.

**8. Delete 50A (s24)** - This was satisfied by the work done by IR in the “Nomination Data Dictionary - Usage for All Model Types” 59 (i1).

Existing 50A:

On the Nominations Web page for the Pathed Model Type, data should be organized in the content area in logical groupings. The logical groupings of data should be as follows:

- Contract
- Dates
- Receipt
- Delivery
- Transaction Specific

**9. New (accidentally deleted from 32 (s15) which was modified to 66):**

For Customer Activities Web pages, the name of the business function should be displayed in the Header.

**10. Modify 60 (d9):**

“Form” is the term used to describe the portion of the Detail of the nominations browser display on the Customer Activities Web sites used for single transaction entry as well as, optionally, data selection. The “Form” should be either in the upper portion of the nominations Detail or alternatively a single page linked to the “Matrix”.

Existing 60:

“Form” is the term used to describe the portion of the Content Area of the nominations browser display on the Customer Activities Web sites used for single transaction entry as well as, optionally, data selection. The “Form” should be either in the upper portion of the nominations Content Area or alternatively a single page linked to the “Matrix”.

**11. Modify 61 (d10):**

“Matrix” is the term used to describe the portion of the Detail of the nominations browser display on the Customer Activities Web sites used to display selected nominations and/or nominations entered on the “form” and, optionally, for data entry. The “Matrix” should be either the lower portion of the nominations Detail (that area below the “Form”) or, alternatively, a single page linked to the “Form”.

Existing 61:

“Matrix” is the term used to describe the portion of the content area of the nominations browser display on the Customer Activities Web sites used to display selected nominations and/or nominations entered on the “form” and, optionally, for data entry. The “Matrix” should be either the lower portion of the nominations Content Area (that area below the “Form”) or, alternatively, a single page linked to the “Form”.

**12. Modify 69 (s44):**

When the nominations Form and the nominations Matrix for the Customer Activities Web site are separate Web pages, a subset of the Form may be included by the Transportation Service Provider in the upper Detail of the Matrix page.

Existing 69:

When the nominations form and the nominations matrix for the Customer Activities Web site are separate Web pages, a subset of the form may be included by the Transportation Service Provider in the upper content area of the matrix page.

**STANDARD FOR DISPLAY OF NON-EDI DATA**

**13. Proposed new standard:**

On Customer Activities Web pages, information which is not part of an EDI dataset may be displayed.

**STANDARD FOR NEW TRANSACTIONS** (similar to 4.3.A/L for existing transactions)

**14. Proposed new standard:**

A Transportation Service Provider which determines to provide via GISB EBB/EDM new features not covered by existing transactions sets, should, at least 30 days prior to implementation of such service, submit a request to GISB including a description of the implementation of the new features along with a recommendation as to whether or not the function is suitable for GISB standardization.
