

**TransCapacity EII TF Work Paper:
Further Standard regarding 4.3.A/L**

Current 4.3 A/L, S21: A Transportation Service Provider which determines to provide new features utilizing existing transaction sets via GISB EBB/EDM, for each transaction upon inception of support for such service, should:

If GISB EDI/EDM or FF/EDM standards exist for the transaction set, provide the service via EDI/EDM, or FF/EDM or both, utilizing modifications defined by the Transportation Service Provider to the existing file structures; and, submit a request for modification or enhancement of the transaction set to GISB including details of the interim EBB/EDM, EDI/EDM and/or FF/EDM implementation.

Proposed 4.3.V: A Transportation Service Provider which determines to provide new services which do not utilize existing transaction sets via GISB EBB/EDM, should, prior to implementation:

Submit a request for standardization to GISB including details of the EBB/EDM, EDI/EDM and, as applicable, FF/EDM implementation; and,

File any appropriate documentation with relevant regulatory agencies.
