

The following proposals are being offered by Dynegy:

1. The content area of the nominations browser display should provide access to a listing of receipt and delivery point locations from which to pick in order to populate this data during transaction entry or selection.
2. Validation messages for nominations submitted should contain the same level of detail for EBB/EDM and EDI/EDM.
3. The Nominator's Tracking ID should be displayed via EBB/EDM.
4. The non-standardized data that is to be entered for the nomination transaction should be ordered last after all the standardized data that is to be entered for the nomination transaction.
5. The Scheduled Quantity Report should be displayed via EBB/EDM and should contain at least the nominated quantities by location, scheduled quantities by location, reduction reasons and contract totals.
