

Proposed Standard:

With regard to processing functions on Customer Activity Web sites, the following standard nomenclature should be used when the associated function is supported by the TSP. TSPs may also support additional processing functions.

Processing Function	Nomenclature
Create a new line item for data entry in the matrix	New
Copy existing data on a screen or window	Copy
Delete the current line item from a screen or window	Delete
Back out of a screen or window without executing the process	Cancel
Save matrix data to a file and the file is not sent to TSP for processing	Save
Print application data	Print
Send record/records to TSP for processing.	Submit
Sort displayed records based on specified criteria	Sort
Retrieve information based on specified criteria	Retrieve
Modify an existing record	Change
Clear fields on a screen or window	Clear
Post a line item from the form to the matrix	Add
Provide information regarding current page or function	Help
Filter displayed records based on specified criteria	Filter
