

TECHNICAL IMPLEMENTATION OF BUSINESS PROCESS

The Response to Request for Information (Response) is sent by the transportation service provider to the data requester in response to receiving and processing a Request for Information (Request). Within the prescribed time period, the requested document, if available, is sent.

The **request ID** is sent back to the data requester in the Response. The **data process date** and **data process time** indicate the date and time the Response was processed.

The **data availability code**, which is included in the Response, indicates whether the requested document is available. In the case where data is available for only a portion of the requested date or date range, then the data availability code will indicate that data is available, and the available data will be sent.

Parties should mutually agree to use the Transportation Service Provider's proprietary entity code when the D-U-N-S® Number is not available.
