

TECHNICAL IMPLEMENTATION OF BUSINESS PROCESS

The Response to Request for Information (Response) is sent by the transportation service provider to the data requester in response to receiving and processing a Request for Information (Request). Within the prescribed time period, the requested document, if available, is sent.

If the data requester supplied a **request ID** in the Request, it is sent back to the data requester in the Response. The **data process date** and **data process time** indicate the date and time the Response was processed.

When returned in the Response, **service requester** and **statement recipient id** reflect their value as stated in the document being requested.

The **data sets requested** data element from the Request is echoed back in the Response. The **data availability code**, which is included in the Response, indicates whether the requested document is available. In the case where data is available for only a portion of the requested date or date range, then the data availability code will indicate that data is available and the available data will be sent.

SAMPLE PAPER TRANSACTION
