

INFORMATION REQUIREMENTS SUBCOMMITTEE
April 23, 1999 -- Conference Call
FINAL Minutes

1. Theresa welcomed the group to the conference call and called the roll.
2. Jim Buccigross recited the anti-trust guidelines.
3. The agenda was adopted as drafted.
4. **EIITF Related**
 - There should be one “data group” column in the data dictionary for each of the Nomination and Scheduled Quantity data sets. These columns were separate because the data group for the Upstream/Downstream Package ID for the Pathed Non-Threaded model type was shown as “N/A”. However, since the EBB Usage for these four data elements is “nu” for the Pathed Non-Threaded model, it is understood that the EBB “data group” is not applicable for the Pathed Non-Threaded model.
 - How will ‘Quantity Data’ data elements be displayed in the Nomination data dictionary? It is difficult to locate the “indented” data elements. This will be addressed at a later time.
 - **NOTE:** The Cross Contract Ranking Subcommittee has deleted the last phrase of the Condition for the Downstream Rank (Priority) data element in the Nomination. (... and may be mutually agreed to for ‘Pathed’ or ‘Non-Pathed’ models.) IR will not make any revisions until this is passed to us from Cross Contract Ranking. This is just a bookmark at this time.

MOTION:

Adopt the additions and revisions made to the Abbreviations document and to the Nomination, Flowing Gas and Invoicing related data dictionaries. (see attached)

Sense of the Room: 7 In Favor; 0 Opposed

Attendees:
