

To: Business Practices Subcommittee Chairs  
From: Jim Keisler, Co-Chair—Information Requirements Subcommittee  
Subject: Issue Regarding Authorization for Overrun Deliveries  
Date: April 26, 2000

At its meeting on April 10 - 11, 2000, the Information Requirements (IR) subcommittee discussed request **R98061** from Colorado Interstate Gas relating to an Authorization for Overrun Deliveries, and determined to send the following question regarding the request to BPS.

During the processing of R98061, IR raised the issue of whether a No-notice shipper's request for authorization of No-notice overrun deliveries requires EDI implementation. There was discussion that this process may be inappropriate for implementation in EDI because there are few data elements associated with this process and it is used infrequently. IR asks that BPS consider this information and instruct IR as to the appropriate course of action in processing this request.
