- Send the following question to BPS:

'During the processing of R98011 / R98012, IR reviewed standard 2.3.21. In the 3<sup>rd</sup> paragraph of this standard it says:

A TSP can agree to send the operational allocated quantities on a daily basis to a SR rather than accept the Upload of Request for Download for operational allocated quantities.

The operational allocated quantities are communicated via the Allocation (NAESB WGQ Standard 2.4.3).

Subsequent to the Executive Committee's adoption of Standard 2.3.21, the data set Request for Information (NAESB WGQ Standard 2.4.7) was developed for the purposes of requesting, among other documents, the Allocation and the Shipper Imbalance (NAESB WGQ Standard 2.4.4).

IR recommends to BPS that the 3<sup>rd</sup> paragraph of Standard 2.3.21, as noted above, be modified to reflect the way in which the Allocation and the Shipper Imbalance may be requested pursuant to the Request for Information.'

- In the Allocation (2.4.3) on the Allocation Transaction Type Matrix, modify the description of the Usage C4 as follows:  
Mandatory when mutually agreed to and submitted in the nomination process and when associated contract is not used for storage balancing. Mandatory in an Allocation provided to a PDA submitter when it is provided in the PDA.
