** When a Transportation Service Provider's proprietary location code is employed pursuant to this standard, the parties agree that nominations, confirmations, scheduled quantities, and capacity release documents employing such code should be for one gas day at a time, and used only until there is a verified common code for the point associated with the proprietary location code. This would include daily nominations over a weekend. Within two months following the availability of the location the parties should employ the common code and no longer employ the proprietary code for identifying such location in the data sets related to the identified standards.

To do list resulting from the development of the Capacity Release Reporting dataset:

1. Add clarity to TIBP concerning Service Requester K as outlined in BPS instruction #1.
2. Provide clarity in the TIBP that the specifics with respect to rollover or evergreen provisions should be contained in the Index of Customers. (BPS Instruction #3)
3. Provide clarity in the TIBP that when an effective rate cannot be described/reported at reporting time using the data elements in the dataset, it should be communicated in Special Terms/Miscellaneous Notes. (BPS Instruction #2) Why?
4. Location/Quantity Type code value descriptions used in data dictionary need to be updated to match code value dictionary
