

**Information Requirements
Storage Report (R98040 and R98050)
As of September 13, 2000**

Technical Implementation of Business Process

The Storage Report allows parties to report on storage balances and activity. The **reporting type** indicates whether the report presents balance information or activity information. Balance type reports present the storage balance only; activity type reports present the storage balance and the activities that affect the balance.

The balance is presented in one of four ways. When location data is not present, the **ending storage balance** is used. When location data is present, at least one of the **location ending storage balance**, the **location ending storage balance--firm**, or the **location ending storage balance—interruptible** is used.

Sample Paper Transaction
