

Internet Look and Feel
Group* Proposal for Standards, Principles, and Definitions
First Work Paper for February ILFT Meeting

Framework Item II.C. Provide a "site map" (table of contents) section using above common terms and categories.

Proposed Standard

S12 The Site Map should be provided as a content document. This document should include links to all levels of categories described in S.5, S.8. Each level of category and subcategory should be intended to show their relationship and will be presented in text form to best utilize space.

Framework Item II.D. Provide word search capability on posted tariff documents.

Proposed Standard

S13 a) TSPs should provide search for word or phrase within the text, headers, and footers of the entire tariff and of the following tariff subcategories:

1. Rate Schedules
2. General Terms and Conditions
3. Form of Service Agreement

The results of the search will provide a list of links to the pages containing the word or phrase.

b) "Search" would appear as a link and labeled as such appearing immediately above the Site Map link.

Discussion Note: The find feature is part of the browser function.

Framework Item III.B. Whenever links to categories to information are displayed on the monitor, they should appear in the same general area of the display.

Proposed Standard

S15 The links to categories of Informational Postings should be displayed vertically on the left-hand side of the screen at all times.

Framework Item III.D. Maximize display space for content.

Proposed Standard

P5 Display space for content on Web sites should be maximized.
