

Natural Gas Clearinghouse
Proposed Common “Look and Feel” Standards

1. Common predictable pattern for the site layout in order to provide easy navigation.
2. Common nomenclature describing the data to be posted.
3. Common position for the Hyperlinks to the non-transactional data.
4. Links to non-affiliated interconnected transportation service providers (TSP).
5. Page navigation for posted documents should be displayed in a common location.
6. The Company name or Logo should be displayed in a common location on the page.
7. Hot links to the TSP Home page through the Company Logo.
8. Common format of headers for documents being displayed.
9. No security and logon procedures should be provided for non-transactional data.
10. Ability should be provided to download entire tariff, as well as specific sections.
11. Ability should be provided to do key word searches on tariff.
12. GISB should :
 - a.) Maintain a list of TSP's on its home page.
 - b.) Maintain a “Link Builder” page to link to a given TSP's data requirement.
 - c.) Allow for selection of the downloading format.
