

To: Gas Industry Standards Board (GISB)
BPS / IR / FTTF Internet "Look and Feel" Team

From: Natural Gas Pipeline Company of America (NGPL)

Date: August 13, 1997

Subject: Strawman submitted by NGPL

The following standards are submitted by NGPL as minimum standards for postings identified in GISB Standard 4.3.6:

1. Logon ID and password are not required to view postings.
2. Netscape 3.0 or higher, Internet Explorer 3.0 or higher, or other equivalent browser
3. File download allows user to specify drive, sub-directory, and filename
4. Document font and style utilize generic HTML style settings (such as H1, H2, FONT SIZE=1) rather than specific codings.

NGPL also submits a sample application for consideration in discussions regarding "look and feel" standards.

NGPL Sample Informational Postings Web Site

NGPL submits the sample postings web site along with the strawman for consideration when addressing “look and feel” standards.

Because the sample web site is a static replica of NGPL’s interactive web postings site, some special coding was required. This coding requires that the Netscape browser version 3.0 or higher running on a Windows 95 machine, with long filenames enabled, be used to view the site as an interactive replica.

To view the NGPL web site replica:

Download the ngplweb.exe file.

Run the ngplweb.exe file. It is a self-extracting zip file. It will default to unzipping in a sub-directory named **ngplweb** on your **c:** drive.

Once the files are unzipped, run the Netscape Navigator browser and enter **c:\ngplweb\infohome.htm** at the location line.

If you do not have Netscape Navigator, you may view the individual pages rather than select postings from the menu. To view individual pages, enter the file names as listed below on the “location” or “goto” line of any browser.

Some notes about the web site replica:

Many buttons, such as Refresh, are not functional.

- Only the first three EBB Notices selections for Natural Gas Pipeline Co. have detail information behind them.

Posting Title	Pipeline	filename to enter in browser
EBB Notices	Natural Gas Pipeline	ngplebb.htm
