ID	FEATURES FOR STANDARDIZATION - Original	The "What" to Standardize	on 8/27/97	or not (Y/N)
A	Established a "most common" denominator of browser level	Technical requirements should be developed which will make	X	Y
		content available to the majority of potential users in the industry		
B	Common site layout for transportation service provider (TSP) Web pages		X	N
C	Common nomenclature for hyperlinks	We should have common nomenclature for hyperlinks	X	Y
D	Common order/format/position for hyperlinks	Where a common nomenclature for hyperlinks has been	X	Y
		established, there should also be a common order and position		
D2		Establish a descriptive term for the non-transactional documents		
		for which these standards will apply to be used as a qualifier		
		when wordsmithing the "what to standardize"		
E	Establish a beginning level of groupings for drill-down of standard navigation links	Establish a common and consistent initial set of hyperlinks to		
		appear for drill-down of mandated navigation links		
F	Establish a standard number of levels for drill-down for the standard navigation links	Establish a common and consistent number of levels for drill-		
		down for the mandated hyperlinks		
G	Establish a method to segregate mandated links from TSP optional links	Establish a standard method of segregating mandated hyperlinks		
		from non-mandated hyperlinks on the TSP Web page		
G		Establish a common and consistent location on TSP Web page		
2		for tabular lists of mandated posted documents and the		
		mandated individual documents (content area)		

G 3		Establish a standard method of segregating the major sections		
		of information defined as common to all the TSP's mandated		
		Web pages allowing the other sections to remain stationary		
		as the user views one section.		
H	Links to affiliated transportation service providers (TSP)	Establish a common and consistent location on the TSP Web		
		page for hyperlink(s) leading to affiliated service providers'		
		mandated Web pages		
I	Links to non-affiliated interconnected TSPs	Establish a common and consistent location on the TSP Web site		
		for hyperlink(s) leading to non-affiliated interconnected mandated		
		Web pages		
J	Page navigation for posted documents should be displayed in a consistent location	Establish a common and consistent location on the TSP Web page		
		for navigation within the content area		
K	Company name or logo should be displayed in a consistent location	Establish a common and consistent location on the TSP Web page		
		for the TSP company name or identifying logo to appear		
L	Hyperlink to the TSP home page through the company logo	Establish that the TSP company logo or identifier will have a		
		hyperlink leading to the TSP's mandated Web pages		
M	Common format of headers for documents being displayed	Establish a standard nomenclature for titles displayed above		
		the tabular lists of documents displayed in the TSP's mandated		
		Web pages		
M 2		Establish a standard nomenclature for column headers		
		appearing in the tabular lists of documents displayed in the TSP's		
		mandated Web pages		

N	Login password not required for access to non-transactional data	Establish standard whereby a TSP may not use a userid and password prompt for their mandated Web pages		
O	Access to the required non-transactional postings shall not be denied to the public	Establish standard whereby an TSP may use a userid and password prompt for their mandated Web pages but must supply a valid userid and password if requested by anyone		
P	Ability provided to download entire tariff as well as specific sections	Establish standard to require TSP site to provide ability to download the tariff in whole and provide the ability to download the tariff by section		
Q	Download format for individual documents will be provided in ASCII	Establish standard file format in which the individual documents could be downloaded		
R	Download format for tabular lists of documents will be provided in tab-delimited ASCII	Establish standard file format in which the tabular lists of posted documents could be downloaded		
S	Provide ability for user to specify target file on client for file download	Establish a standard that when the user is downloading information from the mandated Web pages he/she will be prompted for the target directory path and filename in which to save the downloaded information on the client		
T	Ability provided to do keyword searches on tariff	Establish standard that requires the TSP to provide keyword search capability on tariff documents posted on Web site		
U	Restriction on applets or plug-ins that run on client to achieve functionality	Establish restrictions on code required to download to the client from the TSP Web site necessary to view the mandated Web pages		
V	GISB home page should maintain: a Web page with all TSP URLs hyperlinked	Establish a common Web site with all TSP mandated Web site URLs listed with hyperlinks leading to those sites		

	a "link builder" page whereby users can specify the TSP and group of documents			
	allow for selection of downloading format in the "link builder" specification			
V2		Establish a Web page at the common Web site whereby users may build document selection criteria for accessing mandated documents at any TSP Web site for downloading		
W	Text shall be provided as an alternative for graphic images when viewing in text format	Establish standard requiring text alternative for graphics to allow access by use of text-based browsers		
X	Allow the browser settings to establish font style and size instead of coding those in the HTML tags	No standard		
Y	Establish standard for background color and text color of tabular lists of documents and individual documents displayed	Establish standards for background and text color in the TSP Web content area		
Z		Establish a common means by which users of the mandated Web pages may find the mandated Web pages
