Old Matrix for Proposed Standards /
Fit Under New Framework

ID	The "What" to Standardize	Is it covered under existing framework	Can this fit under framework?	Where does this fit under new framework?	Does the NOPR 587-F talk about this issue
A	Technical requirements should be developed which will make content available to the majority of potential users in the industry	Yes		III C.	
B	Common site layout for transportation service provider (TSP) Web pages	Yes		II and III	
C	We should have common nomenclature for hyperlinks	Yes		II A.	
D	Where a common nomenclature for hyperlinks has been established, there should also be a common order and position	Yes		II A. B. C.	
D2	Establish a descriptive term for the non-transactional documents for which these standards will apply to be used as a qualifier when wordsmithing the "what to standardize"	Yes		I A.	
E	Establish a common and consistent initial set of hyperlinks to appear for drill-down of mandated navigation links	Yes		II A.	
F	Establish a common and consistent number of levels for drill-down for the mandated hyperlinks	No			
G	Establish a standard method of segregating mandated hyperlinks from non-mandated hyperlinks on the TSP Web page	Yes		II B.	
G2	Establish a common and consistent location on TSP Web page for tabular lists of mandated posted documents and the mandated individual documents (content area)	Yes		III A. B.	
G3	Establish a standard method of segregating the major sections of information defined as common to all the TSP's mandated Web pages allowing the other sections to remain stationary as the user views one section.	No
