RE: OASIS 1A Task Force Request for Comments - Redirects

DATE: May 10, 2004

Dear WEQ ITS & ESS Meeting Participants:

The Information Technology Subcommittee (ITS) and Electronic Scheduling Subcommittee (ESS) discussed enhancements to OASIS 1A regarding redirects at the April 6, 2004 joint meeting. At that meeting it was determined that the OASIS 1A Task Force should revise the draft recommendation on redirects to incorporate the discussion at the meeting and format the document in a manner consistent with other NAESB standards. The revised OASIS 1A redirects recommendation is attached for your review.

Please submit any comments to the NAESB Office (naesb@naesb.org) by May 24, 2004. Any comments submitted will be posted and considered at the May 26-27, 2004 Joint ESS/ITS meeting being held in Atlanta, GA.

Best Regards,

Todd Oncken, NAESB Deputy Director

Redirect of Firm Point-to-Point Reservations

Standard X

Transmission Customers shall have the right to request an alternate Point of Receipt and/or Point of Delivery for any Confirmed Point-to-Point Firm Transmission Service reservation. This will be referred to as a Redirect. All redirect requests shall be submitted to the primary transmission provider for review and approval.

Standard X.1

Transmission Customer may request a Redirect on a Firm basis.

Standard X.1.1

Upon request, the TC is entered into the firm point-to-point service queue and evaluated as any other firm request at a curtailment priority of 7 (i.e., at the same priority of all other firm or network designated resource uses of the transmission system).

Standard X.1.1.1

TC is not required to submit an additional deposit.

Standard X.1.2

The TC may request a redirect for a portion or all of the capacity of the original request

Standard X.1.3

The TC may request a redirect for a portion or all of the time period of the original request, so long as the redirect request represents a multiple of an offered service product (i.e. daily, weekly, etc.)

Standard X.1.4

The TC's rights on the original path shall remain unaffected during the evaluation of the redirect.

Standard X.1.4.1

If the redirect is denied for any reason, all rights shall remain per the original reservation

Standard X.1.4.1

Upon confirmation, the TC's firm rights associated with the parent reservation shall be permanently modified to reflect a reduction in capacity equivalent to the redirected capacity for a time period equivalent to that associated with the redirect..

Standard X.1.5

Reductions in path capacity (either the parent or the redirect) that require curtailment of firm rights will be administered in a pro rata fashion.

Standard X.1.5.1

Any reduction in any remaining, unmodified portion of the original reservation capacity shall not impact the redirected capacity.

Standard X.1.6

Redirect requests on a firm basis do not impact the TCs long term firm renewal rights (e.g., rollover or evergreen rights) on the original path, nor do they confer any renewal rights on the redirected path.

Standard X.1.7

The customer may request a redirect on a firm basis for any confirmed firm point-to-point reservation regardless of the parent's Request Type.

Standard X.2

Transmission Customers may request a Redirect on a Non-firm basis.

Standard X.2.1

The TC's request is entered into the non-firm point-to-point service queue at a curtailment priority of 1 (i.e., at a lower priority than hourly non-firm transmission service).

Standard X.2.2

Upon confirmation, the TC's firm rights associated with the parent reservation remain unchanged.

Standard X.2.3

In no event shall the TC's total schedules under either the parent reservation or the non-firm redirected reservation exceed the amount of the parent's Granted Capacity

Standard X.2.4

Reductions in path capacity of the parent reservation shall not impact the TC ability to redirect on a non-firm basis nor reduce the amount of capacity of the redirected request. Granted capacity of the firm parent will be the basis for redirection .

Standard X.2.5

The customer may request a redirect on a non-firm basis for any confirmed firm point-to-point reservation regardless of the parent's Request Type.

Standard X.2.6

A reservation that is a redirect on a non-firm basis shall be a Class Secondary and have a non-firm secondary curtailment priority, lower than firm and non-firm service.
