

This BILLING & PAYMENT INVOICE DATA DICTIONARY Workbook – Data Dictionary SRBO Invoice 41304.xls is made up of two (2) Worksheets as TABS below:

1. Introduction – which you are now reading.
2. Data Dictionary Item Sort – a listing of all the data elements sorted in alphabetical order.
Column A contains the cross-reference numbers to the associated Sample Paper Transaction. **This worksheet is the result of our conference call of 4/13/04 and I have synchronized it with the Sample Paper Transaction that was also modified on 4/13/04 in keeping with our decisions on the data dictionary elements and some general clean-up work as well. This is an original version - not a “clean” version. Note that some cells have a red colored upper right hand corner that signifies a comment is contained in the cell and to see the comment - hold the curser over the target cell. Shaded cells indicate where a modification has been made.**
 - The Sample Paper Transaction as referenced in Columns A of Data Dictionary Item Sort [TAB] has the date of 4/13/04 embedded in the file name so that you will know that it constitutes the latest document related to the SRBO Invoicing process. In addition, if the file name includes the word “clean” after the date, it means that all modifications made to it to-date have been accepted.

TABS (click on them)

DRAFT SINGLE RETAIL BILLING OPTION INVOICE DATA DICTIONARY**TDSP to CR Invoice (note: a separate invoice is sent for Late Payment Charges)**
