**\*\* High Priority \*\***

Rae-

We at Sabre Decision Technologies (SDT) agree to adding the Unit or Basis for Measurement Code field code value of UL (Unitless).

We also recommend adding the following:

- 1) TZ (Thousand Cubic Feet) field code value that exists in Measurement and Capacity Release. LDCs currently apply Mcf in billing. GISB can facilitate LDC participation by providing the TZ code for their utilization.
- 2) A code for gigacalories, the unit of measure for Mexico. GISB provides a currency code for Mexico, and should also provide a unit of measure code for Mexico.

Thanks.
