R97010 Revise the condition of the rate identification code and surcharge identification code data elements to:

Document Name and No: UPPD - Validation 5.4.8

| Business Name | Definition | Usage | Condition |
|-------------------------------|---|-------|---|
| Rate Identification Code | A code which identifies a specific rate. | C | Mandatory when Validation Codes regarding the corresponding data element in the UPPD are returned in the UPPD Validation. |
| Surcharge Identification Code | A code which identifies a specific surcharge. | C | Mandatory when Validation Codes regarding the corresponding data element in the UPPD are returned in the UPPD Validation. |

* Indicates Common Code

Document Name and No.: UPPD - Validation 5.4.8

| Business Name | Usage | Code Values | Code Value Description | Code Value Definition |
|-------------------------------|-------|-------------|-------------------------------|-----------------------|
| Rate Identification Code | C | RES | Reservation | Undefined |
| | | VOL | Volumetric | Undefined |
| | | CAP | Capacity | Undefined |
| Surcharge Identification Code | C | DEM | Demand | Undefined |
| | | CTA | Contract Adjustment | Undefined |
| | | GSD | GSD Demand | Undefined |
| | | RCA | Reservation Charge Adjustment | Undefined |
| | | GRI | GRI Demand | Undefined |
| | | GRIL | GRI Demand - Low Load | Undefined |
| | | GRIH | GRI Demand - High Load | Undefined |
| | | RSVL | Reservation Volumetric | Undefined |
| | | RSBL | Reservation Balancing | Undefined |
| | | ACA | Annual Charge Adjustment | Undefined |

R97016

In the capacity release process, some business practices allow the use of more than 25 rates and/or surcharges within one line item*. The ANSI X12 limit for the segment containing these rates and/or surcharges (SAC segment) is 25. To accommodate more than 25 rates and/or surcharges within one line item, multiple PO1 loops must be created for the additional SAC segments. These PO1 loops are tied together by the value of the PO101 element, which must match in these multiple PO1 loops. The first occurrence of the PO1 loop of a line item must contain the applicable data elements per GISB's specified usage. The subsequent corresponding PO1 loop(s) would only contain the PO101 and the additional SAC segments. No other segments (other than PO1 and SAC) would appear in the subsequent corresponding PO1 loop(s). Since multiple line items may occur, it is necessary to differentiate one line item from another. This is accomplished by assigning a unique PO101 value for each unique line item.

The above language and technical mapping shown in the recommendation (R97016) should be applied to Offer 5.4.1, Bid Review 5.4.2, Award Notice 5.4.3, UPPD 5.4.7, UPPD Notification 5.4.9.
