- The above nomination opportunities represent times which a shipper can expect to be supported by TSP's and all confirming parties for synchronization across the N. American pipeline network (GRID).
- "Unused" capacity means additional pipeline capacity available for scheduling as determined by the TSP.
- The "scheduled quantity and bump notices" means that the response from the TSP is in the Shipper's designated site by the time stated above.
- **NOTE 1:** GISB takes no position on whether a pipeline bumps or not. This NOTE 1 is applicable to TSP's that have chosen to allow intraday bumping, and means that TSP's should choose one or both of these nomination cycles. As shown in the untimely nomination cycle above, a TSP should also make a one-time election to allow bumping at 9 AM or 5 PM. These Additional bumping opportunities are to be determined by the TSP and its customers and, as necessary, through regulatory filings.
