Proposed Standard Changes

In response to the industry comment period for the 5 requests for standard changes outlined in the GISB memo dated Mar. 13, I am submitting the following comments on behalf of TransCanada PipeLines Ltd for your consideration:

R96097: "Modify the level of response on the Nomination Quick Response from Transaction level to Contract level."

==> We believe that this proposed change to the Nomination Quick Response transaction data set (i.e. to relay the status of the Nomination at the Contract level as well as the Transaction level) is unnecessary. The Quick Response data set already contains sufficient information on the status of the individual nominations within the transaction set to enable the service requester to determine the status of each contract included within the transaction set.
