TO: GISB Executive Committee & Posting for Interested Industry Participants
FROM: Rae McQuade, Executive Director
Kim Van Pelt, Chairman, GISB Technical Subcommittee
RE: Cleanup Items
DATE: January 16, 2001

From the minutes of the Technical Subcommittee meeting on 08/03/2000:

For R99041, the TIBP for the Scheduled Quantity was modified to clarify the usage of the two possible code values for Reduction Reason. When the code values were changed with R97064D, we did not make corresponding changes to the TIBP. Below is the text from the TIBP as approved with R99041, redlined to show the necessary changes for R97064D. We consider this to be an omission or cleanup item for recommendation R97064D.

Standards Book: Nominations Related Standards, Technical Implementation of Business Process for the Scheduled Quantity (1.4.5)

[Revise the fourth paragraph as follows:]

“It also includes one or more **reduction reasons** which may indicate why a nominated quantity was reduced. In some cases, GISB standards require a code to indicate the specific reason for a reduction. In other cases, the code may indicate that no such reason is required. The sending of more than one reduction reason is on a mutually agreed basis. Therefore, if the receiver does not accept multiple reduction reasons, only the first occurrence of the reduction reason sent (~~SI segment, Elem 1000 = "RR" where LO01 = "RED"~~) will be utilized. Since sending multiple reduction reasons is a mutually agreed practice, any additional occurrences of the reduction reason sent (~~SI segment, Elem 1000 = "RX" where LO01 = "REE"~~) may be discarded. There may be a total of five reduction reasons sent (one where ~~SI segment, Elem 1000 = "RR" LO01 = "RED"~~ and up to four where ~~SI segment, Elem 1000 = "RX" LO01 = "REE"~~)."

sense of the room: recommended (3-0)

Additional Cleanup Items identified at the Technical Subcommittee Meetings on May 18, 2000 and October 20, 2000:

TECHNICAL CHANGE LOG (all instructions to accomplish the recommendation)

Document Name and No.: Pre-determined Allocation (2.4.1)
Bid Download (5.4.2)

Description of Change:
G860PDAL - Pre-determined Allocation (2.4.1)
Transaction Set Tables
"N1 Segments (Sub-detail)" table: for data element "Receipt Location/Receipt Location Proprietary Code", change N101 column from "MQ" to "M2"
G843CRBR - Bid Download (5.4.2)
Sample X12 Transaction
change "REF*99*A" to "REF*98*A"
