

**To:** Rae McQuade

**Date:** January 30, 1997

**From:** Technical Subcommittee

**Subject:** Technical Subcommittee Comments on Requests for Modifications to Existing Standards or Creation of New Standards due by January 31, 1997

**Request Number:** R96108

**Requestor:** PanEnergy Corp

**Description:** Add error codes and warning codes to Nomination Quick Response.

**Task Force Recommendation:** Change as modified

**Subcommittee Comments:** Two of the error messages recommended by the Market Execution Task Force in this request were also recommended for addition by request R96026. They are Invalid Downstream Contract Identifier and Invalid Upstream Contract Identifier. These messages were also assigned error codes by the Technical Task Force on two separate occasions. They are ENMQR562 and ENMQR563 (R96026) and ENMQR568 and ENMQR569 (R96108). Both R96026 and R96108 are in front of the EC for approval on 2/5/97. Only one set of codes is needed and the Technical Subcommittee recommends that the two codes assigned for R96026 should be kept and the two codes assigned by R96108 should be discarded. This modification does not affect the other error and warning codes recommended by R96026 or R96108.
