Attn: Veronica Thomason

Diane McVicker, Chair of Title Tracking, indicated I could send questions to the GISB office for our next meeting.

Please let me know if you would like me to follow a different process for communicating these questions.

Thanks you for your help!

Questions listed below

ALL transfers of title at a meter must be nominated to the transportation service provider?

Title Transfers between two different TTT+s at the same meter must be nominated to the transportation service provider?

If a 3rd party TTT is the only person currently authorized to track TTT transactions at a TSP's receipt meter, then the transportation service requester nominating from that meter should denote the TTT as the upstream party whenever the supplier is a party who is not transporting on the interconnected pipeline?

Per page 96 of the Final Order 587-G, it appears that the Commission feels transportation into a pool should be given the same transportation priority out of the pool. If a third party TTT is involved in Title Tracking at a pipeline pooling meter, how will the priority of the nominations going into the pool be determined by the pipeline?

What happens when the Operator confirms true physical flow at a meter but the TTT is unable to confirm/verify the entire daisy chain? What is the time frame for clearing up any title transfer discrepancies?
