I am forwarding the below comments on the Coordinate Operations Business Practices Task Force scoping document on behalf of Conectiv Energy.

Thanks.

Subject: Draft Comments on NAESB COBP Scoping Document

The proposed scope should address the issues created by the existence of proprietary operating practices and their necessity to Companies as ways to maximize their competitive advantages. Any proposed standard should address:

- Protection from anti-trust concerns (For example: "Sharing with others", "Acting with others" "Sharing Results of Analyses")
- [Existence of](#) confidential procedures [to protect company](#) strategies and/or practices from competitors
- Recognition of the [tension between](#) maximizing reliability [on the one hand and maximizing appropriate](#) shareholder value [on the other](#).
