From: [Scott Brown – Exelon](#)
To: NAESB office

I finally had a chance to look at the draft annual plan for 2004. I have 2 suggestions to consider.

1. Add a place holder for standards development based in the NAESB Seams Subcommittee. I assume the work of this group will result in standards development work in 2004.
2. Add a bullet for work associated with FERC Docket PL03-1 Policy Statement on reporting and indices. I believe there will be requests for standards in this docket or associated dockets by FERC.
