

Comments submitted by We Energies

We Energies has reviewed the revised OASIS 1A redirects recommendation and has the following comment:

At this time, the only item we would like to address is the ability to redirect firm network transmission on a firm basis similar to the ability to redirect firm point-to-point. We currently have the ability to redirect firm network and the FERC determined that network transmission service should be allowed similar provisions for redirect as point-to-point service based on the assumption of equal treatment of service.

Thank you for your consideration,

Sandy Murrey

Subject: OASIS 1A Task Force Request for Comments - Redirects

Dear WEQ ITS & ESS Meeting Participants:

The Information Technology Subcommittee (ITS) and Electronic Scheduling Subcommittee (ESS) discussed enhancements to OASIS 1A regarding redirects at the April 6, 2004 joint meeting. At that meeting it was determined that the OASIS 1A Task Force should revise the draft recommendation on redirects to incorporate the discussion at the meeting and format the document in a manner consistent with other NAESB standards. The revised OASIS 1A redirects recommendation is attached for your review.

Please submit any comments to the NAESB Office (naesb@naesb.org) by May 24, 2004. Any comments submitted will be posted and considered at the May 26-27, 2004 Joint ESS/ITS meeting being held in Atlanta, GA.

Best Regards,
Todd Oncken, NAESB Deputy Director
