

NAESB - Standard Review
Subcommittee Update

NERC MC Meeting

3/23/2004

Standards Review

- Purpose
 - Review of proposed NERC standards from the business practice standpoint
 - Communicate concerns to NAESB EC
 - Promote discussion for any further NAESB action to develop a complementary NAESB standard
 - Provide information to NAESB JIC members

Review of NERC Standards Under Development

NERC Standards Under Development	Corresponding NAESB Activity
Balance Resources and Demand	No companion BP standard
Determine Facility Ratings and Operating Limits	Followed closely
Coordinate Interchange	Assigned to EES
Coordinate Operations	No companion BP standard
Operate Within Interconnection Reliability Operating Limits	Being reviewed

Operate Within Interconnection Reliability Operating Limits

- Reviewing the need for the business practice standard.
- Existing TLR Procedures not included in the draft SAR
- Does NERC MC see a need for a companion business practice standard?
 - Notify market of the IROL level/problems?
 - Market driven congestion mechanism to relieve IROL problems?

Operate Within Interconnection Reliability Operating Limits

- Potential next steps (after receiving input from the NERC MC):
 - Modify the scope document @ march 31 SRS meeting.
 - Recommendations from the WEQ executive committee (may 4, 2004).
 - Post scope document for industry comments.
 - Submit NAESB standard request.
