

Implementation Plan for Revisions to IRO-006 for Market Flows

Prerequisite Approvals and Activities

There are no other reliability standards or Standard Authorization Requests (SARs), in progress or approved, that must be implemented before this revision to IRO-006 can be implemented.

Functions That Must Comply with the Proposed Revised Standard

Standard	Functions That Must Comply With the Requirements
IRO-006	Reliability Coordinators Transmission Operators Balancing Authorities

The functions that must comply with the revised standard are the same functions identified for the original standard.

Compliance with Proposed Standards

For all the requirements in this proposed revision to IRO-006, entities are already expected to be fully compliant and no additional time should be needed to meet that compliance. The proposed changes to the standard allow entities greater flexibility but don't require any entity to use that flexibility. Thus the use of the new 'Market Flows' is entirely optional.
