The Bidweek Indications are provided for informational purposes only.

Volume counted on sell-side only. The daily Bidweek Indication is the volume-weighted average price of fixed price trades executed on ICE for the specified day at the specified hub. The daily Bidweek Average to Date is the aggregate volume-weighted average price of fixed price trades executed on ICE for the specified days at the specified hub.

*Prices in italics represent physical basis prices.

ICE Month Ahead Natural Gas Price Report

for JUL-08

[methodology](#)

The ICE Data is pleased to provide you with this new Month Ahead Natural Gas Price Report containing ICE Monthly Indices based on actual bidweek trades. All trades were either executed on the ICE trading system or confirmed in the eConfirm trade confirmation system after having been executed directly between the counterparties or through a voice broker. Trades executed on the ICE platform or confirmed via eConfirm feature verification by both counterparties on all key data items including price, quantity, product, delivery location, start/end date, and trade date.

Note 1: Due to overwhelming feedback from industry participants, physical basis transactions executed on ICE during bidweek will now be included in the ICE Index Price calculation. These basis deals, typically confined to the Gulf and Northeast markets, will be converted by ICE into a fixed price - based on the last day settlement price for the corresponding Futures contract.

Note 2: Our exclusive use of verified trade data avoids doublecounting. Therefore, when comparing these indices with those reported by the trade press, you should double our volume and number of trades.

<u>Location</u>	<u>High</u>	<u>Low</u>	<u>Avg. Daily Volume</u>	<u>No. of Trades</u>	<u>No. of Companies</u>
