**Subject:** NAESB Communications from the Managing Committee to the WEQ EC

Dear WEQ EC and Alternates –

At the conclusion of the EC meetings in Colorado Springs, Valerie Crockett and I took the request from the WEQ EC to the Managing Committee regarding the scope issue that had arisen for two-tiered curtailment. Their response is provided in the link below. They wanted to provide this response to you as quickly as possible so that it would not interrupt or otherwise delay the important and difficult work that you are doing for the industry.

Kathy York and Jim Castle, your chair and vice chair, have asked that I also include the following remarks to accompany the Managing Committee communication: *“Jim and I are proud of the work that the WEQ subcommittees are doing for our quadrant. We are confident that these directives will assist the committees in making progress towards great industry standards and look forward to the Business Practices Subcommittee bringing work products that suit the needs of the overall wholesale electric quadrant. Please join us in applauding and supporting the BPS for their efforts.”* I couldn’t have said it better.

As an industry-led organization, we are very fortunate to have such volunteers as yourselves and our subcommittee participants that are willing to commit their time and expertise to NAESB. We are a credible organization because of your efforts.

With Best Regards,

*Rae*
