   ___Data Element (x.4.z)  
   ___Code Value (x.4.z)  
   ___X12 Implementation Guide  
   ___Business Process Documentation  

3. RECOMMENDATION  

   SUMMARY:  

   • Add proposed NAESB WGQ Principles 5.1.z2 and 5.1.z3.  
   • Add proposed NAESB WGQ Definition 5.2.z1.  
   • Add proposed NAESB WGQ Standards 5.3.z12, 5.3.z13, 5.3.z14, and 5.3.z15.
STANDARDS LANGUAGE:

5.1.z2 Proposed Principle
The service flexibility available to either the Releasing Shipper or the Replacement Shipper(s) for the subject capacity should not be less as a result of the recall.

5.1.z3 Proposed Principle
Notice of the allocation of capacity between the Releasing Shipper, provided through the Transportation Service Provider’s Customer Activities Web site, and the Replacement Shipper(s), provided for in NAESB WGQ Standard Nos. [5.3.z2] and [5.3.z3], should be provided in a manner that will permit affected parties sufficient time, as provided for in NAESB WGQ Standard No. [5.3.z1], to place nominations or take other corrective actions to avoid penalties.

5.2.z1 Proposed Definition
Elapsed Prorata Capacity means that portion of the capacity that would have theoretically been available for use prior to the effective time of the intraday recall based upon a cumulative uniform hourly use of the capacity.

5.3.z12 Proposed Standard
For the recall notification provided to the Transportation Service Provider (TSP), the quantity should conform to the TSP’s capacity recall notification specification. The TSP should specify whether the quantity should be expressed in terms of:
   a) total released capacity entitlements or
   b) adjusted total released capacity entitlements based upon the Elapsed Prorata Capacity.
   The capacity entitlements resulting from the use of either a) or b) should be the same.

5.3.z13 Proposed Standard
In the event of an intra-day capacity recall, the Transportation Service Provider (TSP) should determine the allocation of capacity between the Releasing Shipper and the Replacement Shipper(s) based upon the Elapsed Prorata Capacity (EPC). Variations to the use of EPC may be necessary to reflect the nature of the TSP’s tariff, services, and/or operational characteristics.

5.3.z14 Proposed Standard
The Transportation Service Provider should not be obligated to deliver in excess of the total daily contract quantity of the release as a result of NAESB WGQ Standard No. [5.3.z12].

5.3.z15 Proposed Standard
The amount of capacity allocated to the Replacement Shipper(s) should equal the original released capacity less the recalled capacity.
4. SUPPORTING DOCUMENTATION

a. Description of Request:

b. Description of Recommendation:

Executive Committee
On 7/29/2002, the Executive Committee made the following motion: Assign consideration of proposed standards concerning capacity allocation and billing with regard to order 587-N to the BPS, including the issues raised by FERC staff. The motion passed a procedural motion with 10 in favor, 4 opposed, and 1 abstention.

Business Practices Subcommittee
See the Business Practices Subcommittee (BPS) meeting minutes, attachments, and transcripts for the supporting documentation and discussion for the following dates:
July 23, 2002
August 7-8, 2002

On 08/08/2002, it was motioned to adopt the following standards (as proposed above): 5.2.z1, 5.3.z12, 5.3.z13, 5.3.z14, 5.1.z2, 5.3.z15, 5.1.z3.
