Abstract / Discussion (E-1, E-3, E-4): The requested Validation Code value (Request Selected Has Been Rejected) would inform the nominating party that the nomination being submitted is already in the TSP's system with a status of 'rejected'. This request was rejected by METF. GISB Standard 1.3.7 states: "All nominations should be considered original nominations and should be replaced to be changed. ..." Thus, the nomination should be rejected again using the existing Quick Response Validation Code values. A new code value is not required.
