Abstract / Discussion (E-1, E-3, E-4): Add a data element "Service Requester" to the Request for Confirmation and Confirmation Response dataset. Usage would be Mutually Agreeable (MA) in the Request for Confirmation and Conditional (C) in the Confirmation Response dataset.

Currently the Service Requester Contract field exists in the confirmation process. This request proposes to add the Confirmation Requester's identification to the confirmation process. While the contract is the information more familiar to the requester, the requester ID is more familiar to the confirming party.

Request states this supplies meaningful information to the operator.
