Abstract / Discussion (E-1, E-3, E-4):

During the August 22, 1996 meeting of MSTF discussed standard 3.3.14 and determined the language should be revised to clarify the point at which the clock begins for each of the three forms of communication currently used by the gas industry. Many MSTF members feel the current language requires invoices to be sent certified mailed. On October 17, 1996 MSTF reviewed the proposed language to ensured it clearly states the postmark or time-stamp to be used for each form of communication. The task force unanimously agreed it does.
